ANDREW BONIFACIO

Portfolio: https://www.andrewbdesign.com/
Email: contact@andrewbdesign.com
Github: https://github.com/andrewbdesign
Mobile: 0450 250 792
Specialty: JavaScript, CSS/SCSS, ReactJS

Projects

Project Reset: (Commercial project)
Scope: Qantas Frequent Flyer program was going to make major changes to their loyalty program. To build a landing page to showcase these changes. Expected daily traffic was 12 million users.
Role: Built the front end. Browser supporting up to IE10. Created interactive components that communicated with Qantas backend API.
Technologies: CSS/SCSS, JavaScript/ES6, React, GreenSock, Lottie
URL: https://frequentflyer.qantas.com

Qantas Car Insurance: (Commercial project)
Scope: Qantas was going to introduce Car insurance for the first time. Was assigned to build 8 responsive landing pages. Worked with the Qantas design lead and development team in normal HTML, CSS, and JavaScript.
Role: Built the frontend in vanilla HTML, CSS, JavaScript. Had to build up to 14 modules according to the design.
Technologies: HTML, CSS/SCSS, JavaScript/ES6, jQuery
URL: https://insurance.qantas.com/car-insurance

Seek Salary Report: (Commercial project)
Scope: Seek wanted an interactive salary report for each industry/role and compare it to the country nation salary average. There were 2 versions of the site: the Australian and New Zealand variation. Data was hosted on a cms backend (contentful).
Role: Built the front end. Used ReactJS for main framework. Website communicated with API via backed cms contentful. Had to build for 4 versions: AU candidate, AU hirer, NZ candidate, NZ hirer.
Technologies: CSS/SCSS, JavaScript/ES6, React, GreenSock, ChartJS, contentful
URL: https://www.seek.com.au/career-advice/page/salary-insights

Experience

Slik - Creative Agency
2015 - 2018, 2019 - Present
Role: Developed dynamic display ads and used GreenSock API for animations.
Worked closely with clients such as Qantas, Fairfax/NINE, Suncorp, AAMI, HCF.
Developed dynamic display ads that fetched data over APIs.
Technology stack: HTML, CSS/SCSS, JavaScript/ES6, GreenSock library, VueJS, React, Angular

Snakk Media - Creative Agency
2018
Role: Working on the Celtra ad platform. Developed features that weren't native to the ad platform. Was working as a Front-End Developer. Help the creative team by building prototypes for their ideas. Mobile and tablet testing; debugging on devices

Hobbies

Ping pong, Guitar, Travel.
